Glasgow Outcome Scale - Extended

Patie	ent's name:		Date of interview:
Date of Birth: Date of injury			Gender: M/F
Age	at injury:	Interval post-injury:	
Resp	ondent: Patient alone	Relative/ friend/ carer alone	Patient + relative/ friend/ carer
Inter	viewer:		
	CONSCIOUSNESS		
1.	Is the head injured person a words?	ble to obey simple commands, or say any	1 = No (VS) 2 = Yes
long	er considered to be in the vege		communicate specifically in any other way is no idence of meaningful responsiveness. Corroborate ollege of Physician Guidelines.
	INDEPENDENCE IN THE	HOME	
2a	Is the assistance of another activities of daily living?	person at home essential every day for some	1 = No 2 = Yes If "No" go to question 3a.
look on c pers	after themselves. Independent lean clothes without prompting	ce includes the ability to plan for and carry out g, preparing food for themselves, dealing with	urs if necessary, though they need not actually the following activities: getting washed, putting callers, and handling minor domestic crises. The ding, and should be capable of being left alone
2b	Do they need frequent help time?	or someone to be around at home most of the	1 = No (Upper SD) 2 = Yes (Lower SD)
0.000,000,000	a 'No' answer they should be a l not actually look after themse	:	8 hours during the day if necessary, though they
2c	Was assistance at home ess	ential before the injury?	1 = No 2 = Yes
	INDEPENDENCE OUTSI	DE THE HOME	
3a	Are they able to shop without	ut assistance?	1 = No (Upper SD) 2 = Yes
	includes being able to plan winally shop, but must be able to	78 X	behave appropriately in public. They need not
3b	Were they able to shop with	nout assistance before the injury?	1 = No 2 = Yes
4a	Are they able to travel local	lly without assistance?	1 = No (Upper SD) 2 = Yes
	y may drive or use public trans uselves and instruct the driver.	port to get around. Ability to use a taxi is suffi	cient, provided the person can phone for it
4b	Were they able to travel with	thout assistance before the injury?	1 = No 2 = Yes
III			

	WORK				
5a	Are they currently able to work to their previous capacity?		1 = No 2 = Yes		
If they were working before, then their current capacity for work should be at the same level. If they were seeking work before, then the injury should not have adversely affected their chances of obtaining work or the level of work for which they are eligible. If the patient was a student before injury then their capacity for study should not have been adversely affected.					
5b	How restricted are they? a) Reduced work capacity. b) Able to work only in a sheltered workshop or non-competitive job, or currently unable to work.		1 = a (Upper MD) 2 = b (Lower MD)		
5c	Were they either working or seeking employment before the injury (answer 'yes') or were they doing neither (answer 'no')?		1 = No 2 = Yes		
	SOCIAL & LEISURE ACTIVITIES				
6a	Are they able to resume regular social and leisure activities outside home?		1 = No 2 = Yes		
They need not have resumed all their previous leisure activities, but should not be prevented by physical or mental impairment. If they have stopped the majority of activities because of loss of interest or motivation then this is also considered a disability.					
6b	What is the extent of restriction on their social and leisure activities? a) Participate a bit less: at least half as often as before injury. b) Participate much less: less than half as often. c) Unable to participate: rarely, if ever, take part.		1 = a (Lower GR) 2 = b (Upper MD) 3 = c (Lower MD)		
6c	Did they engage in regular social and leisure activities outside home		1 = No		
	before the injury?		2 = Ves		
	before the injury?		2 = Yes		
	FAMILY & FRIENDSHIPS		2 = Yes		
7a			1 = No 2 = Yes
